

ACHIEVING ETERNAL LIFE
WITH OUR ANGELICAL PET
Diplomada: Ylse Helfer
Doctor: Guillermo Rivera Diaz

Dedication

—To the souls of our pet Rocky who are still alive and to those who were reincarnated.

—To Guti, Javier and Michele's pet, friend of our eternal pet Rocky.

_To my dear grandson Troy, his wife Kendra and my great granchildren.

- To Scott his wife Amanda and their daughters Emma and Nadia.

- To my brother Emerich and his daughters and sons.

—To my cousin Winnie for her service and mission to the community

- To my brother in law Miguel ,my nephews Miguelito and Erick and family

-To my neighbors Rogelio and family

- To my friend Oliveiro and his family

- To our friend Arlene for her affectionate friendship .

-To my friend Hilda and her husband for their friendship.

-To my friend former co-worker, Dale and her husband .

—To my friend Betty Sánchez for her dedicated care that she provides to the pets of our city.

-To all my friends and ex coworkers at Haven House, for their valuable support and friendship.

—To my daughter Silvia María and my grandson Adriano, for her love, to her pet Luna and defense of animals.

—To the souls of the pets of our dear reader friends.

—To the little dogs who suffer and are abandoned and who wait for kind human beings to adopt them as their own children.

Table of contents

1. Death of my grandparents and their pet

2. My promise to know about the existence of the canine soul

3. The angelical mission of our pets and the achievement of our immortality

4. We were taught to forgive for love

5. Our childhood and youth with our pets and angels

6. Student dawn and graduations with our pets

7. Ylse's pet's death

8. How we met ylse

9. Canine angels appear

10. After 58 years I found her again.
She lived in Rio Rancho Nuevo
Mexico

11. What would my rival be like?

12. Death of her daughter Kathy who
tells her she will be reincarnate

13. I dream about my daughter and her
presence in her room

14. Another appearance of her
daughter

15. They did not believe her version

16. The medium and science said that
her daughter had not died

17. How Ylse met her pet Rocky

18. I asked my angel for a sign

19. Engage and married at 73 years old

20. Rocky's routine and his powers

21. Free, loving emotional therapists

22. Rocky heals on our physical and emotional wounds

23. Rocky heals us in pandemics

24. He looked for us and walked for two days

25. Massages and preparation for Rocky's elevation to paradise

26. Preparation for reincarnation of Rocky

27. Rocky's physical death

28. Rocky was not dead; he was alive

29. Rocky saves our lives

30. He was still our son

31. Reincarnation of Rocky

32. The vet confirms that he was Rocky reincarnate

33. Rocky's same kisses

34. The healings of our grandson Rocky

35. God gave us Rocky

36. Rocky's friends

37. The hormones of rejuvenation and eternal health

38. The altar for our pets and happy memories

39. Preparing us for our immortality

40. Global warming, the destruction of the planet and the lack of love

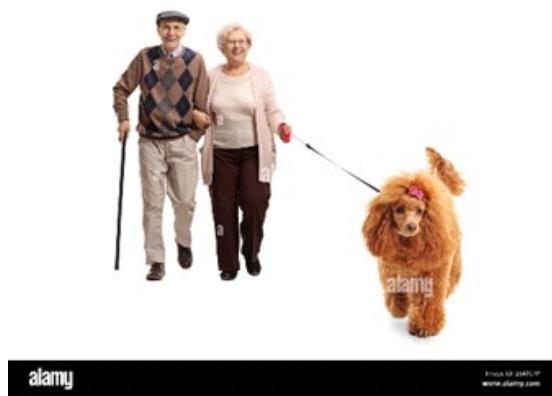

41. Avoiding the indifference of grandchildren towards their pets

42. Suffering of canines in Latin America

43. The request of our and your pets

44. Ylse y sus mascotas eternas de Rio Rancho , y otras ciudades de Nuevo Mexico.

1.DEATH OF MY GRANDPARENTS AND THEIR PET.

In my childhood, with five siblings, we had a pet that we played every day and that was our greatest joy.

When I was about eight years old, I frequently visited my grandparents who were about 70 years old. With them was their pet, bought on the recommendation of my grandmother's cardiologist, instructing them both to walk with that little animal, as an

inevitable routine, to strengthen their circulation and improve their health.

Strictly complying with the instructions, they managed to become attached to each other to such a point that they came to consider that he was the grandson they longed to adopt and that he would accompany them until both of their deaths.

The pet learned the routine and even knew the time time to go for a walk, so he waited for the leash and they took the route to the park; There, holding hands they walked, holding their pet's leash with the other hand.

Everything was perfect, but one day when contemplating the beautiful roses that had bloomed in the garden,

they neglected the pet's leash, which he silently began to play not only in the gardens but also on the track, a large number of vehicles were circulating and one of them ran over it, killing the little animal.

The grandparents suffered great pain from this misfortune, crying inconsolably, which affected them greatly, giving rise to the whole family and friends getting together to try to console them.

We also visited them, to accompany them in their pain. They, in the midst of that grief, did not stop going to the park and continuing with their routine, but every day they lost the will to live to such a point that they went so far as

to affirm that their life had no meaning.

Then they fell into depression and became ill. They hired two nurses, for day and night. As they were still sleeping in the same bed, they agreed not to get up and wait for death; undoubtedly they could not overcome the stage of grief.

Barely a month later, they died and their bodies were joined by clasped hands.

2. MY PROMISE TO KNOW ABOUT THE EXISTENCE OF THE CANINE SOUL

house with the death of their pet and themselves affected me greatly, it marked my life.

While I placed a rose on each of their chests, I promised them that something fundamental in my life would be to dedicate myself to researching those very special beings that are pets, so that the day would come when I could finally understand how the life of a little animal ended up being decisive for my grandparents.

Monsignor Mario Canciani maintained that dogs have something similar to a soul and that the ecclesiastical authorities already affirmed this.

The popes – John Paul II and Francisco – stated that, as canines are living beings, they would also have a place 'reserved in heaven', and that “life after death is not only a gift for believers, but also for animals.”

The position of the supreme pontiff – who takes his name precisely from Saint Francis of Assisi, patron of animals and nature – was very clear when indicating that “heaven is open to all creatures, there, they will receive the love and joy of God, without limits.”

3. THE ANGELICAL MISSION OF OUR PETS AND THE ACHIEVEMENT OF OUR IMMORTALITY

With Ylse, my friend and neighbor, we shared pleasant moments during breaks at the school where we studied. We were able to read about the existence of canine angels, with the appearance of their real physical body, who came into our lives with a special mission of unconditional love to allow us spiritual growth and the immortality of the soul.

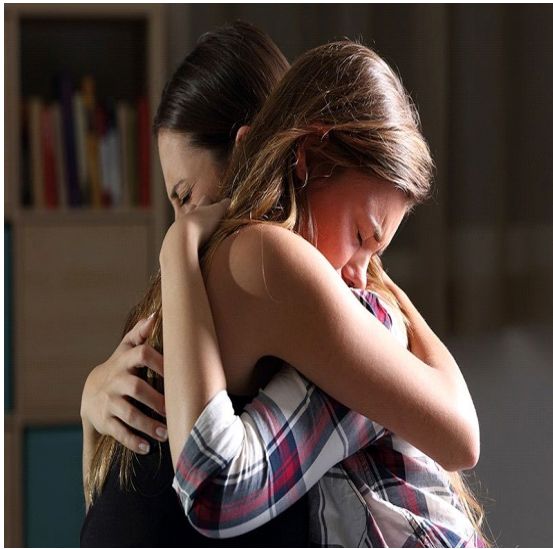

We both learned this:
during the last five years we had
gotten angry with family members; In
each conflict we had cried a lot.

On the contrary, when we called our
pets' attention and yelled at them for
something inappropriate they did or
punished them, those little dogs never
became bitter or, much less,
abandoned us, it happened that they
humbly approached us to caress us
with their tongue, show us their
affection and attachment, as if they
consoled us.

That affection for our pets was one of
the primary factors that brought us
together, with which we concluded
that, just as we lived in this life

together, we could also live it on other levels of existence, after death.

4. WE WERE TAUGHT TO FORGIVE FOR LOVE

That was the first example of love and forgiveness that they taught us and that was the main factor in achieving love and eternal life, deducing that pets consoled us and made us regain the joy of continuing to live.

On the day of our closing of primary school, the same school where we met

and our pets met, when we said goodbye, because we would not see each other during the three months of vacation, I shed some tears.

Ylse told me: Don't cry again, because they will bully you! I responded that when male pets moan, get sad or cry when I left them at home... they were never teased about it; On the contrary, I consoled them.

5. OUR CHILDHOOD AND YOUTH WITH OUR PETS AND ANGELS.

We told each other how was in our homes, when sometimes our relatives returned home in a bad mood, worried about their problems, fears or other reasons, they were indifferent or they mistreated the pets.

When we were alone, the pets accompanied us and made us lose fear and they made us happy.

In the park ,we saw invalids, the sick, children and the elderly accompanied by their pets, smiling calmly and confidently, as if they were their other family.

Sometimes ,we used to ask them and some answered that they were happier than with their real family.

And when we returned from school, it was the pets who received us more affectionately than the human family.

That experience made Ylse, a cartoonist and painter, make many paintings of these animals and investigate their spirituality and the angelic life of dogs.

6. STUDENT DAWNS AND GRADUATIONS WITH OUR PETS

In my university years, my pet accompanied me to my classes; He sat at the back of the auditorium, also when I graduated as a lawyer, teacher, and physical therapist. It seems to me that it was like my amulet and transmitter of positive energy.

Likewise, something similar happened with Ylse when she graduated as an Associate in sciences with emphasis on domestic violence and also animal support and training in health care and assistance with the physical and emotional health of patients in the areas of community health.

In her last job, on the eve of retiring as a public servant, her pet accompanied her to work, with the permission of her bosses.

7. YLSE'S PET DEATH.

I had the opportunity to read “Life after Life”, and I asked Ylse: ¿Have you ever had a pet die?, and she answered: Yes, I was 12 years old and my dog Rintintín was hit by a vehicle. He was very badly injured, but he did everything possible to crawl to my house, a few meters from the accident, dying when he was almost next to the door.

Ylse said: “It was terrible for me. It was impossible to stop crying. I hugged his body trying to breathe life

into it, in vain. Something of my heart died with my dog.”

8. HOW DID YLSE AND I MET

Ylse and I met at the beginning of adolescence, already finishing primary school.

We were neighbors, our houses were opposite each other. She lived at his grandmother's house. We met when we were 10 years old, we lived across the street.

She wanted for me to be her partner at the promotion party, her grandmother gave her a resounding no, not approving her request, so she started to cry with anger and helplessness, she consoled herself by hugging her dog imagining it was me.

Our platonic love consisted of communicating by signs from window to window. Before going to sleep it was a must that we wave at each other good night.

9. CANINE ANGELS APPEAR

Every time I have thought about Ylse, one or more feathers always appeared floating in the air, that is why I started researching about angels.

We usually called each event rare inexplicable or special coincidence or coincidences.

And in that desire to find answers I came to understand that quantum physics talks about “synchrodestiny” which are facts or warnings that occur in our lives and that, from a universal higher intelligence, perhaps managed

by superior beings or spirits, they send signals to improve our lives, to choose a correct path or to establish and understand a mission in our lives.

In all cases I noted it down in detail, arriving at the conviction that angels exist; Perhaps they are loved ones who have converted or our dead pets, they could even be the pets of our ancestors or other people who lived in the house we live in.

When I was a child I lived in the countryside with my grandparents and my parents, having numerous dogs there, so I managed to establish an excellent relationship with those animals and even without me knowing it, it may be that on many occasions they cured me of some illness or

prevented me from harm that I didn't even imagine.

Later, when those pets died, it may be that they continued to evolve until they became angels and that they were present in my life.

10. AFTER 58 YEARS I FOUND HER AGAIN. SHE LIVED IN RIO RANCHO NUEVO MEXICO

The platonic love that we established continued as an unbreakable chain over time, even more than half a century that we could not see each other.

I periodically wondered what would become of her, if she would be married or divorced, if she would have children or not, if she would be a widow taking care of her grandchildren, if she was happy or not. Anyway, I even wondered if she was still thin as before or if she had gained weight, if she had gray hair or not.

The truth is that I never forgot her. She was occupying my thoughts at all times. For decades I continued to see her in my memory as that tender,

affectionate, very intelligent young girl, with great attachment to animals and painting.

Finally, after repeated searches, after 58 years of not seeing her or hearing from her, one night I found a small white feather on my bed: it was the sign of my angel! Immediately afterwards, a few moments later, the name of Ylse Helfer appeared on my cell phone screen and I excitedly wrote:

“Hello! Are you the skinny girl who lived with her grandmother, on the second floor of the light blue house, when we finished primary school?”

“Yes, and are you Mito, the neighbor across the street, with the red bicycle?”

“Yes of course! I'm happy to have found you! How are you?”

“Good, good.”

“Can I ask you if are married?”

“No. I am widowed, I have two grandchildren.”

“What are you doing?”

“I continue working, I take care of my pets and I paint them in various paintings.”

“Didn't you have partners again?”

“I'm just with my partner... Do you want me to introduce him to you?”

I froze, feeling like everything was lost.

“Mmm... Well, if you want...” I wrote, nervously.

“Hang on a minute.”

She left and a few seconds later in the audio I heard:

“Love, reward me with one of your kisses; I'm going to introduce you to someone!”

I felt bad, really bad, and I even wanted to turn off my cell phone. I could tell that she was very in love, without a doubt, so I was superfluous.

11. WHAT WAS HE LIKE?

At lightning speed I asked myself what he was like: young, old, white, dark, tall, short, maybe lame or athletic, bald or curly and with a lot of hair? A thousand images flew quickly through my mind.

I expected with hope that he was an invalid, a stutterer, half-blind, ignorant... but those negative thoughts were the product of jealousy and my

desperation. These seconds of my silence finally passed and she said:

“Wait, I'm going to connect the video.”

She then appeared hugging a white dog:

“Mito, this is my partner! His name is Rocky.”

My heart sped up and beat again. I felt that God, my mother's spirit and my angel performed the miracle I had been waiting for so much.

Ylse, thin as always, continued petting her pet. With a comforting voice I said:

“Your pet is cute. Do You love him a lot?”

With her unforgettable smile she responded:

“He is my angel, I live for him. He's like my son. My daughter sent it to me. Don't be surprised how much I love animals.”

For 20 minutes she didn't stop talking to me about Rocky, about his antics, about the happy times he spent with the spoiled dog.

“He also shows me his affection, his attachment; I feel it and live it every moment.”

I felt that I could never compete with that way of loving, because I considered it absorbing.

The weeks passed quickly and we became a human couple. Two months after that I asked her:

“Love, do you think you will come to love me the way you love Rocky? I confess that I feel like my rival and I laughed briefly.”

I instantly continued:

“I know situations of friends who lived a similar situation and recognized that they felt some type of jealousy, but did not have the courage to tell their partners.”

“Life, human love and animal love are two totally different types of love.”

12. DEATH OF HER DAUGHTER KATHY WHO TELLS HER SHE WILL BE REINCARNATE.

Referring to her pet, another day I asked Ylse “Can you tell me in detail what the first meeting with your pet was like?”. She answered:

“My daughter got sick and became very delicate. Death was irremediable. Minutes before she died, holding my hands she said: Little Mother, you know how much I love you and I will continue to love you because only my physical body will die, my soul and spirit will continue to live and you will continue to have me by your side because I will be reincarnated, you will see.

“At the moment she died in my arms I saw, very surprised, that a kind of white shadow came out of her body and went towards the window and

walked away, rising. I thought that she had not actually died, but rather gone to paradise.

13. I DREAM ABOUT MY DAUGHTER AND HER PRESENCE IN HER ROOM.

Ylse afflicted continued:

“Three days after her death, in the morning when I woke up, I saw on the side of my nightgown two beautiful white feathers and in my window that overlooked my garden was a yellow

and green bird, I thought they were her signs and I was grateful to my angels.

“At night I dreamt of her, we were in the garden, she hugged me, she told me that she still loved me and that she was happy in a paradise where everyone was happy fulfilling their missions. I didn't want the dream to end.”

14. ANOTHER APPEARANCE OF HER DAUGHTER

Ylse continued:

“A few days after the physical death of Kathy I was coming from work and in the darkness I looked up seeing a ray of light sliding towards me. Instantly I felt something fill my heart and soul with joy and hope.

“The next day I saw the same light again, but it was flickering and with

less speed. I was excited again and the conviction arose from within me that it was my daughter Kathy. I had no doubt about that. I was convinced that my daughter was alive.

“When I returned to my house at night, when I was about to open the door, something made me look up: the ray of light was there again, but motionless, then it disappeared. Full of joy and happiness I entered the house , and went to sleep and my dream I saw my dear daughter.

“A week later, at night, in a place in my garden I observed two tiny lights, just thinking that it was surely the reflection of the light from the house in the eyes of some kitten or other animal that was lurking there.

“Indeed, it was an abandoned kitten. My conviction was that it was Kathy's soul, which was already beginning to visit me.”

15. THEY DID NOT BELIEVE HER VERSIÓN.

Ylse continued saying:

“Logically, when I told my version to friends and neighbors, many did not respond, but showed their disbelief. It didn't occur to them that for me it was a divine experience. Their astonishment and disinterest showed

me that they knew nothing about this topic.

“My family then suggested that I hire a medium to get to the truth, and thus prove to everyone that I was not losing my mind. We managed to locate one who claimed to be an expert scientist, as well as a medium, specialized in the topic of reincarnation of humans into animals and animals into humans.

16. THE HIRED MEDIUM SAID THAT HER DAUGHTER HAD NOT DIED

“The hired medium said that he managed to communicate with my daughter and confirmed that it had been scientifically proven that humans, through some signals, gave signs of what was happening.

“To verify this, we asked him to repeat verbatim what Kathy said, responding: ‘Dear mother Ylse, I am well and very happy, surrounded by family in a true paradise, I feel the love that I give and that I receive. Soon I will move to another level of the astral field and I will be reincarnated. You will hear from me and you will receive the gift I offered you. I love you so much. Do not be afraid of death, it does not exist, we just go to another level.’

“My whole family attended the session and was amazed as was I. I cried with emotion, remembering my previous dead pets and I asked the medium if the souls of those animals would be in that paradise; He said that it had been proven that animals have

souls and that there were cases of reincarnation in other animals or in human beings.

“That news filled me with joy and hope. I didn't ask any more, but I kept thinking that my daughter would be reincarnated as my next pet and that she would be immortal.”

17. HOW YLSE MET HER PET ROCKY

Ylse continued to explain:

“When I woke up the next day, I found a beautiful white feather in my bed, I heard Kathy's voice and I sensed that she was with me. Already on the street I managed to see some wings flying towards me. I stopped, carefully

observing what was around me, managing to see a little dog; I made affectionate gestures to him, talking to him; He came a little closer, then left. I thought it would be very sad if a car ran over him.

“I got into the car that would take me to work before I closed the door, the Little dog ran towards me, ready to follow me. I immediately lifted him into my arms, like a mother does with her abandoned child.

“I felt the need to caress him and from that moment I adopted him, being sure that he was the son who would calm my hours of sadness due to the painful memories derived from the loss of my only daughter. I was convinced that it was Kathy reincarnated.”

18. I ASKED MY ANGEL FOR A SIGN.

I considered that it was normal to feel doubts when making decisions that will affect your life.

In that sense, Ylse's coworkers and herself were doubtful about the convenience of us getting married. I myself had doubts about it, so I asked my angel to send me some sign.

Then it happened that while my cell phone was off, the song “Angel” by

Cristian Castro came out through its speaker, whose lyrics say:

I would like to love you until dawn,
kiss you slowly and get lost in your skin,
meet your lips in an endless kiss,
all for your love, just give me a sign.

Angel who gives light to my life,
You are the air I want to breathe.
Angel that soothes my wounds,
Don't go away, I'll die if you're not there.

At night I stay awake without mercy
When I go through your image in my sad loneliness,
Fugitive from pain I go looking for an illusion.
Give me a sign to believe in this love.

Angel who gives light to my life,
you are the air that I want to breathe,
angel that soothes my wounds
don't go away, I'll die if you're not
there,

Angel take me on your wings
to the top of this great love.
My hope lives in your soul,
My heart is in your hands.
You, my angel, illuminate our love,

You my angel...

Thus came the sign from my angel
that blessed our relationship and the
decision to get married.

19. ENGAGE AND MARRIED AT 73 YEARS OLD.

Intense conversations continued to try to recover something of the 58 years we were apart. By then I was already practicing visualization. At night I saw the scene in which we hugged each other with great tenderness.

In reality it happened exactly the same as I dreamed. I found her with the soul of an artist, with great spiritual and emotional intelligence. She was the woman of my dreams and we got engaged.

The non-negotiable agreements to get married were to respect our spaces, love and spiritual sexuality. Love and care for Rocky.

Then in a beautiful ceremony that we would perform in the field we got married. My sister Ana María and my nephew Javier were our godparents, Rocky and the pet of my nephews Javier and his partner Michele Guti were the canine witnesses, (obviously without the requirement of signing our birth certificates) and with their affectionate and playful behaviors they quickly conquered the hearts of all guests.

We later found out that they quietly got engaged.

As with a child, our daily routine consisted of preparing breakfast for him, taking him out to relieve himself, walking him through the places chosen by him and imagining what he thought when he did this or that thing, perhaps if in one of his previous lives he had been a cat, rabbit or person.

20. ROCKY'S ROUTINE AND HIS POWERS.

Indeed we wanted Rocky as another son. Our daily routine consisted of preparing and serving him his breakfast, taking him out to relieve himself.

He liked to walk around the chosen places, removing the earth to cover his excrements.

We played with his present and imaginary friends. Before going to bed we prayed with him at the altar.

At bedtime, we talked to him and gave him massages.

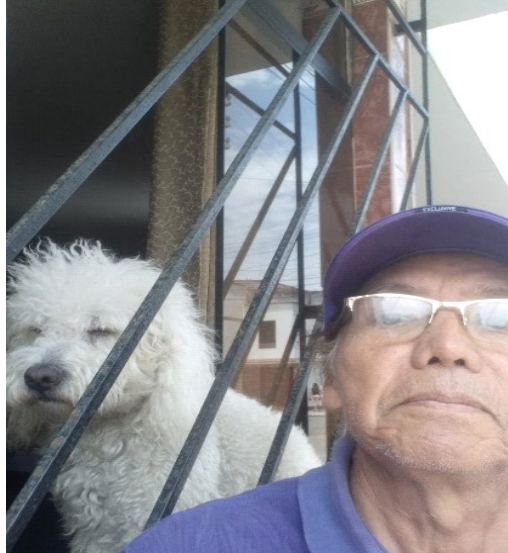

When Rocky sensed that we were going out into the street, he began to walk around and take out his toys, showing that he wanted to go with us.

If we couldn't take him, upon our return, as soon as we approached the door he would bark tenderly and when we entered he would return to his mischief with the toys.

The neighbors praised him and he played with their pets, which we sometimes took care of.

He was very sensitive to vibrations of all kinds, achieving very high connections; He was like an energetic radar, always alert, with impressive hearing sensitivity as well as his sense of smell and vision, which allowed him to see other dimensions and planes of consciousness that we did not perceive, which is why he warned us by barking when two tremors occurred and he started barking. constantly in the presence of negative people and entities.

21. FREE, LOVING EMOTIONAL THERAPISTS.

When we felt sad or lonely, he looked for a way to get us out of that state; Sometimes the famous “lick in the face” was our best therapy.

The movement of its tail generated vibrational waves that harmonized the environment, sending signals of love; It was a universally known and very necessary vibration.

Rocky was our therapist and when he had pain in some part of his body he would lick it and it would heal, the same when I was in pain.

If Rocky got sick, it was Ylse who suffered and she couldn't imagine life without him.

Rocky's affection was unconditional. Pets do not abandon their owners, even if we fall in love with other pets.

We had more than eight pets and none of them abandoned us. They had no addictions, they were not alcoholics, gamblers, they did not betray their partners, they could have coital sex for three minutes, but they did not abandon their children or us, they were not spiteful.

Loving our pets is a lifelong feeling;
They always die physically in our
arms between kisses moistened by our
tears.

22. ROCKY HEALS ON OUR PHYSICAL AND EMOTIONAL WOUNDS

With the death of Ylse's mother,
husband and daughter, and two other

close relatives, we were very affected by these open wounds.

These emotional and affective pain influenced the appearance of some other diseases such as arthritis and osteoarthritis.

Thanks to the caresses and kisses of our pet, especially when he rested on our sore organs, the discomfort disappeared.

Through our studies on canine powers we understood that he absorbed negative energies, although it produced imbalance and energetic imbalance, weakening him.

So we took him every day to the park and other green areas, where he

sniffed the plants and ate some small portions, drinking water and thus purging himself.

23. ROCKY HEALS US IN PANDEMICS.

During the Chinese Covid pandemic in which hugging and kissing were prohibited, we took refuge in Rocky, which is how he transmitted its positive energy to us, improving and healing our immune system.

Their acts of affection of animals produced Oxytocin, an essential hormone, in their bodies, demonstrating that animals also produced it. Thus he became our savior.

According to studies carried out at the Azabu universities of Sagamihara (Japan) and Emory (Atlanta, USA), when a dog and its owner look into each other's eyes, caress and hug each other, they both release oxytocin, which further reinforces the emotional bond between them.

This chemical substance is the engine that ignites and shapes a large part of our behaviors such as empathy, trust, friendship, generosity or altruism.

The connection between humans and dogs is fueled in part by oxytocin.

That feeling of warmth and affection that we feel when we see our dogs is also perceived by them. That is, this scientific study confirmed what we already knew.

24. HE LOOKED FOR US AND WALKED FOR TWO DAYS.

On one trip, when we were putting gas in the car, we got careless and, believing that our pet was in the vehicle, we left without realizing that

she had gotten out and remained in the place. We only missed him hours later. We called by phone so they could look for him and take care of him, but they couldn't find him. The authorities indicated that we should return to our home and that he would possibly arrive there.

Indeed, on the third day, upon hearing his barking and scratching the door with his claws, we ran to open it, hugging him happily. Thus the torment ended. His loyalty to us was shown in all its fullness.

25. MASSAGES AND PREPARATION FOR ROCKY'S ELEVATION TO PARADISE.

Our pet was living many years longer than the average for his breed.

When he could no longer get up we massaged his entire body and he stopped complaining. He stood up again and slowly played with his toys.

We prepared him for his elevation to another higher life by telling him that he had been a good son, that we loved him very much and that all his peers were waiting for him in canine

paradise. We told him not to worry about us, because we would never stop loving him and that we hoped to continue communicating. Thus he died calmly and in peace.

26. PREPARATION FOR REINCARNATION OF ROCKY.

We managed to make our relationship very intense, his consciousness increased between the “canine angel” and the human, accompanying us in different lives.

Once we are grandparents, our children are reincarnated as a “canine” friend or child and return to us and our descendants, of course with another appearance, protecting your new life and your new family.

However, something inside you feels that this pet has something very special that makes you have a particular empathy and you will even find idioms, quirks, games and other details that will make you remember the previous one.

That is because the essence of the dog never changes, it is the same dog evolving into a new body.

When giving him massage sessions in his energy zones, we caressed him,

telling him how much we loved him, causing him to renew his energy and expand his auric field.

The renowned doctor and scientific researcher, Deepak Chopra in his book “We Will Never Die”, as well as other scientists, gave us evidence based on Vedic philosophy, quantum physics, psychology and neuroscience, which showed us that physical death, It is not the end of life, because life is eternal.

It was also confirmed that our pets recognize themselves and have their own level of self-awareness, which allows them, among other things, to dream.

For this reason, when Rocky slept, knowing that he was on another level of consciousness, we spoke to him, telling him how much we loved him, we told him his qualities and that when he rises he would always continue living in other lives.

27. ROCKY'S PHYSICAL DEATH.

When Ylse had Rocky in her arms she felt that his breathing was fading little by little, she approached and with her kisses she closed his eyes, as she expired rays came out of her body like

white cloudiness or a white shadow that rose to the sky. Ylse and I looked at each other tearfully, knowing that her soul would continue to live for eternity.

We buried him in our garden with his toys, roses and bougainvilleas, his favorite clothes and photos of us and his friends.

We lay on the bed praying for his soul and felt faint noises emerge in the room like the sound of his favorite toy. We sneaked into that room watching his toys move and we saw him playing with them.

28. ROCKY WAS NOT DEAD; HE WAS ALIVE.

The atmosphere was dim, four days after his physical death. We were returning from shopping and we saw him running out of the room with his toys.

At the door he stood on two legs, we hugged each other happily. He was alive! Since then we have felt it several times. Ylse wakes up sometimes feeling Rocky's kisses, I have also felt his tongue lick my cheek.

29. ROCKY SAVES OUR LIVES.

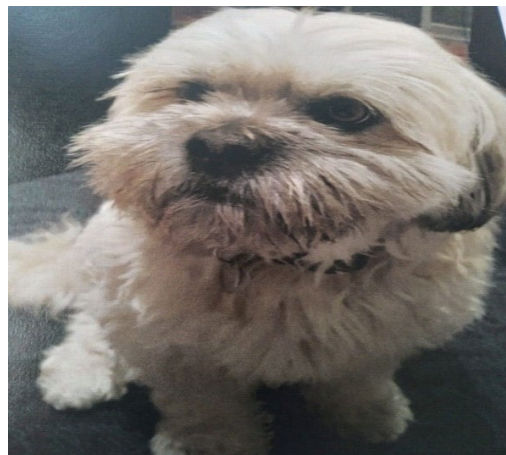

A month after his physical death, while I was walking with Ylse down the street, two criminals approached to assault us, gun in hand. We stopped terrified, but at that moment a huge dog approached, barking and ready to attack the assailants, who upon seeing it preferred to flee immediately.

The strange thing that gave us security is that the barking of the dog that defended us was exactly the same as Rocky's.

This is how he saved us from that attack. Later on other occasions we have also felt his presence at crucial moments. This little dog continued to be our protector.

30. HE WAS STILL OUR SON.

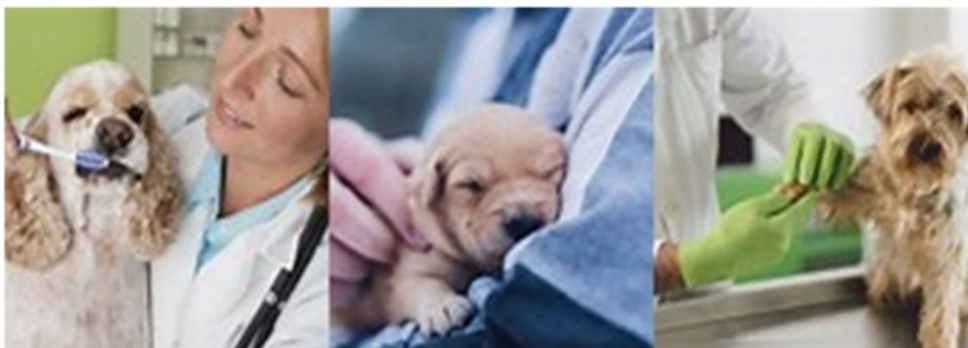

We had Rocky and we still love him, because he was like our naughty, playful, loving son. When the wear and tear on his body no longer allowed him to have a pleasant and bearable life, and because he had also fulfilled his mission in that life with us, the

veterinarian advised putting him to sleep. So he died in my arms.

Since this loss was very painful for us, a very dear family member asked us to take care of his health, and we decided to move to that city.

31. REINCARNATION OF ROCKY.

We prayed all the time to have a pet that looked like Rocky.

Already settled in Trujillo, we rented an apartment that the teacher Nancy and her husband cordially provided us with. As soon as we finished our installation, when we left and just two blocks away we saw a little white dog; We instantly shouted excitedl: It's Rocky! He looked a lot like him and we went up to pet him, he was sitting in the window of that house.

Ylse claims that she heard him say: “Hello, parents, it's me, reincarnated.”

He immediately came down, took out a toy and came back to us. There was no doubt it was Rocky. The owners looked at us amazed because we were

crying very emotionally and they handed us a glass of water.

The gentle owner asked us the reason for our crying and we told her the story. She said her little dog was called Nano.

32. THE VET CONFIRMS THAT HE WAS ROCKY REINCARNATE.

We went to a vet and he confirmed that it was indeed a reincarnation. From that day on we left full of hope of finding Rocky again, but we couldn't.

Meanwhile, Ylse already suffered from arthritis due to age. Looking at Rocky's photo from his bed, she was inspired to go see Nano. Next to him she hugged him and kissed him.

33. ROCKY'S SAME KISSES.

Nano responded to the kiss and did it exactly like Rocky did. She felt like an electric current that ran through her body to her most intimate depths. Excitedly she told me: Take photos of me, quickly, quickly!, fearing that the dog would stop kissing her. I did the same. We told him we loved him and we said goodbye.

34. THE HEALINGS OF OUR GRANDSON ROCKY.

Returning home, a few steps later, Ylse told me: Mito, my pain disappeared! It doesn't hurt anymore! Rocky's kisses have cured me! Is an angel!

During the repair work in the rented house I had a huge headache and other discomforts. I decided to go to the pharmacy for some painkiller, but Ylse stopped me: Go to Nano, our Rocky; May he kiss you and heal you! We both laughed and that was it.

Later, Nano's owner told us that her little dog had started a new style of waking up her family with caresses, just like Rocky did with us.

35. GOD GAVE US ROCKY

We always thought how beautiful it would be to have Rocky as a grandson. After eight months the neighbors visited us saying that they would be traveling for a long time and that we should please take care of their

Nano. We were happy with that request and committed immediately.

A few days later they called by phone to indicate that their return would be after a long time and that they had decided to give us their pet because they knew that we loved him very much.

We immediately thanked him for his gesture and then we knelt and prayed: it was the best gift we got that Christmas.

From that moment on he was our true son. We started calling him Rocky and he understood perfectly, forgetting his previous name.

36. ROCKY'S FRIENDS.

Rocky was enjoying the park and making friends quickly, playing with pets like real brothers, like the animals of my nephew Javier and his partner, that of teacher Nancy and my grandson Adriano.

37. THE HORMONES OF REJUVENATION AND ETERNAL HEALTH.

Despite being part of the elderly group, already past 70 years old, those who knew us were surprised to see that we were still vigorous.

We explain to them that we have three types of age: chronological, physical or physiological and emotional. The average of them was actually the true age, adding that according to the Indian doctor, Deepak Chopra, what preserved longevity and rejuvenated

was the love hormone, oxytocin, with dopamine because they produced those chemical substances that, when transmitted throughout the body, improve defenses and the immune system.

One of its fundamental factors is to prevent diseases; That meant that one was younger to the extent that one received the greatest amount of love, affection, tenderness, and we owed all those component factors to our pet, Rocky, because he was the source of those chemicals.

Our friends bought their pets, proving that their permanent love was a source of youth, health and was at home.

38. THE ALTAR FOR OUR PETS AND HAPPY MEMORIES.

In one part of our living room we made our altar with photos of our pets and our loved ones because as long as we have them in our thoughts, actions and life projects, they never die and become angels, being one of the best ways to achieve the immortality of those animals.

Fortunately, since Ylse had dedicated herself so much to the pets in caring for them and receiving their affection,

she even helped her dedicate her drawings and paintings to them, which helped her not to feel alone or abandoned, thus resulting in that relationship with the pets helping her a lot overcome the misfortune of her orphanhood, the death of her husband's daughter and recently of her dear sister Karla. In all those sad stages she never felt alone but accompanied by her pets, her true and greatest comfort and her memories of all the beautiful and happy moments shared that were still present in our lives.

39. PREPARING US FOR OUR IMMORTALITY.

It has been scientifically proven that by increasing the consciousness of human beings and our pets, the sensitivity of their bodies and spirits increases, and those souls like Rocky's that are already more developed are the ones that rise.

So on nights with Rocky we would put up the photos of the pets and he would

play with each of those friends, in this way he would also capture the energy of all of them.

We also felt stronger and full of energy. If we noticed that Rocky was sad or weak for transmitting his energy to us, we would reciprocate it with our own or that of the other pets.

When we returned from the street, without making any noise, we saw how he played with everyone who was present or in the paintings or photographs, he approached them wagging his tail, walked around them or hugged them; so we knew that he was not alone at all times. He had always stayed in the company of his little friends, exchanging their energy.

Thus, with Ylse we managed to lose the fear of death and we were happy to know that we would not die, we would continue living in the many lives that awaited us and that our love would remain alive for all eternity.

40. GLOBAL WARMING, THE DESTRUCTION OF THE PLANET AND THE LACK OF LOVE.

A study published by the journal Nature and scientific studies on the warming of the planet whose consequences are floods, fires, droughts and other atmospheric phenomena that we are experiencing, indicate that the migration of animals due to the increase in global temperature and destruction of habitats will cause a "network of new viruses" that will affect human health.

Today's humanity lives absorbed by individualism at a high level of negative selfishness, discarding long-term relationships and preferring superfluous and immediate ones, because "they no longer believe in love".

For all this, "Our families look for a vaccine against anguish, loneliness, depression and fear, which is why there are immediate, superfluous relationships without emotional commitment".

The essential thing is to improve our immune systems and defenses through the love and service we provide to others. Scientifically, this provides us with the necessary hormones and that source of energy and love is provided by our pets.

41. AVOIDING THE INDIFFERENCE OF GRANDCHILDREN TOWARDS THEIR PETS.

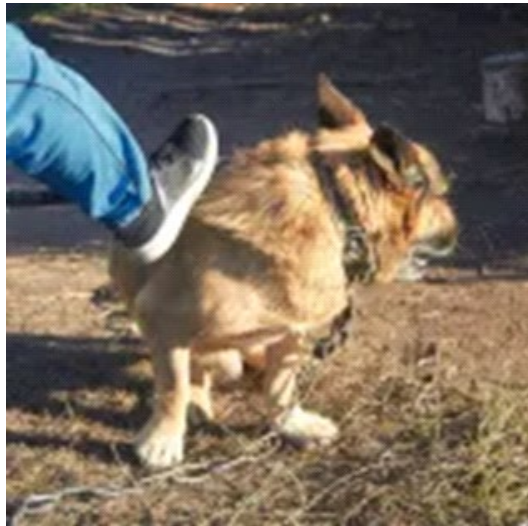

According to global studies and statistics, it is being noted that 41.8% of children and young people feel indifference towards their grandparents.

According to data from the latest barometer of CIS (Centro de Investigaciones Sociológicas), which talks about society's perception of the treatment of the elderly, children and young people prefer smartphones and

tablets over pets, ignoring that precisely the loneliness in which they live is when they most need the company of pets.

42. SUFFERING OF CANINES IN LATIN AMERICA.

More than six million dogs are abandoned on our planet, with Latin America being one of the regions that concentrates the largest number of abandoned dogs; most were victims of abuse by their own owners.

43. THE REQUEST OF OUR AND YOUR PETS.

Faced with so much pain resulting from environmental pollution, destruction of the planet, family crisis, crisis of values, abandonment of the elderly, with Ylse we approach to pray and closing our eyes we hear that our pets and those of you friends and brother readers They told us with a loving voice: Now they have the mission of reaching all the hearts of children, young people, adolescents and pet owners with this message, so

that they can achieve their true eternity of happiness.

Ylse and I continue with this new mission of loving service of caring for and developing the soul of pets, visiting our parents, grandparents, grandchildren and great-grandchildren, passing on this story to them and sowing love and care for their pets in their hearts, achieving that overcome one of the most harmful fears of the time: the fear of death.

We need them to know that our souls will never die and that we will be eternal through the many lives that we will have to go through.

Throughout this mission the souls of our protective pets will always accompany us.

. 44. YLSE AND HER ETERNAL PETS FROM RIO RANCHO AND NEW MEXICO

Ylse continued to live in Rio Rancho, New Mexico, painting and caring for her beloved pets and their owners, promoting their rejuvenation and eternal life.

This story will continue....

If you could share this story, our Dear pets will thank you.

DIPLOMADA: YLSE HELPER

- Associate in science degree with emphasis on public health and outreach

- Diploma in health care and assistance with the physical and emotional health of patients, in the areas of community assistance.

- Researcher in the spirituality of canine pets.

- Legal Advocate at Haven House.

- Director at INFAMIL.
